PROFILE SUMMARY

Web Developer building real-world web applications with modern technologies. Skilled in writing clean, maintainable code and creating responsive, user-friendly interfaces, with practical experience in both frontend and full-stack development.

Hands-on project work has provided a solid understanding of web development concepts, and open to contributing to development teams, learning, and growing within professional environments.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript (ES6+), TypeScript, React, Next.js, Tailwind CSS, Bootstrap

Backend & Databases: MongoDB (Mongoose), PostgreSQL (Prisma)

Auth & APIs: NextAuth, JWT and session based custom Auth, REST APIs **Tools:** Git, GitHub, Vercel

PROJECTS

Echo — Social Media Web App

Next.js, PostgreSQL(Prisma)

- Built authentication, posts, follows, mood based filters and real-time chat
- Implemented session-based authentication with OAuth (Google)

Virtual Question Bank — Exam Platform

Next.js, Express.js, MongoDB(Mongoose)

- Developed timed exams, analytics, and admin/student dashboards
- Implemented JWT-based authentication and role access

BoostMe — Creator Support App

Next.js, MongoDB(Mongoose), NextAuth

- Built creator profiles, donations flow with Payfast (test environment), and dashboards
- Implemented secure authentication and clean UI flows

EDUCATION

2023 - 2025

BS Computer Science

Virtual University of Pakistan
